INTRODUCTION

Thank you for participating in today's training designed to cover some updates to our HIPAA Basic Training for Privacy and Security course. We will be going over the HIPAA Security Rule and the information that we must familiarize ourselves with. To include Personable Identifiable Information (PII), Personal Health Information (PHI), and electronic Personal Health Information in order to comply with federal regulations. Let's begin...

Are you compliant with the

HIPAA SECURITY RULE?

HIPAA SECURITY RULE

Sets national standards for the security of Protected Health Information (PHI) and electronic Protected Health Information (ePHI) that may be held and or transferred digitally.

Requires administrative, physical, and technical safeguards.

DEFINING IMPORTANT TERMS

Health Insurance Portability and Accountability Act (HIPAA)

- The Health Insurance Portability and Accountability Act came into effect in 1996 as federal law as the national standard for health care agencies to protect and not disclose sensitive patient health information without the consent of the patient. The Privacy Rule and the Security Rule are critical facet of HIPAA.

DEFINING IMPORTANT TERMS

Personal Identifiable Information (PII)

- Personal Identifiable Information is any information that may directly or indirectly identify an individual

Personal Health Information (PHI)

- Personal Health Information that is held, maintained, and transmitted between health care organizations

Electronic Personal Health Information (ePHI)

- electronic Personal Health Information

SAFEGUARDS

Administrative

- Actions, policies, and procedures to detect, contain, and ultimately prevent security intrusions and violations.
- Risk Management
- Staff Training

Physical

- Implementing methods to protect electronic information and relocatable buildings and equipment from environmental hazards and unauthorized entries.
- Alarm and Security Systems

Technical

- Policies and procedures that maintain ePHI to allowing access only to authorized personnel or softwares and to prevent unauthorized access to information. Unique user identification, emergency access procedures.
- Data encryption
- Antivirus software

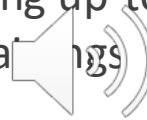

SAFEGUARDS

Culture

- Emphasizing a nurturing environment for employees to value and prioritize protecting patient information without fear of reprimands.
- Treating all patient information with great importance.

Training

- Maintaining up-to-date annual trainings
- Urgent mandatory trainings when policies, procedures, infrastructures and more are updated.

DISCLOSURES

HIPAA

- Through its Security Rule and Privacy Rule, prevents the disclosure of PII, PHI, and ePHI of any patient information to anyone or anything without consent of said patient.

SECURITY RULE

- supports the Privacy Rule's prohibition against improper uses and disclosures of PHI

PRIVACY RULE

- “A covered entity may not use or disclose protected health information, except either: (1) as the Privacy Rule permits or requires; or (2) as the individual who is the subject of the information (or the individual's personal representative) authorizes in writing.”

THANK YOU
