

CMIT Project 3

[The human resource department is updating its HIPAA Basic Training for Privacy and Security course. As a security analyst for the hospital, you have been tasked with covering the topics in the training related to the HIPAA security rule and the information that hospital staff need to know regarding personally identifiable information (PII), personal health information (PHI), and electronic personal health information (ePHI) to comply with federal regulations.]

This week, you will submit your PowerPoint presentation. The presentation should include narrative voice overlays for each slide. Include one to two slides (i.e. for a total of 4-8 slides) for each bullet point below explaining the following:

- HIPAA Security Rule (1-2 slides)
- HIPAA, PII, PHI, and ePHI Definitions (1-2 slides)
- Safeguarding of PII, PHI, and ePHI (1-2 slides)
- Disclosures of PII, PHI, and ePHI (1-2 slides)

Note:

The slide count of your presentation does not include the title slide, table of the content slide, introduction slide, and references slide. Include 2-3 quality references to support your assertions.]

Need to know information (1-2 slides per):

Intro slide: Welcome to the Privacy and Security Training Session

Table of Contents

- Table of contents
- Introduction
- Hipaa security rule
-

HIPAA Security Rule

- Sets national standards for the security of Protected Health Information (PHI) and electronic Protected Health Information (ePHI) that may be held and or transferred digitally.
 - Requires administrative, physical, and technical safeguards.
<https://www.hhs.gov/hipaa/for-professionals/security/index.html>

Definitions

- HIPAA – The Health Insurance Portability and Accountability Act came into effect in 1996 as federal law as the national standard for health care agencies to protect and not disclose sensitive patient health information without the consent of the patient. The Privacy Rule and the Security Rule are critical facet of HIPAA.
- PII – Personal Identifiable Information is any information that may directly or indirectly identify an individual. <https://www.dol.gov/general/ppii>
- PHI – Personal Health Information that is held, maintained, and transmitted between health care organizations.
[https://privacyruleandresearch.nih.gov/pr_07.asp#:~:text=The%20Privacy%20Rule%20defines%20PHI,of%20non%20U.S.%20citizens\).](https://privacyruleandresearch.nih.gov/pr_07.asp#:~:text=The%20Privacy%20Rule%20defines%20PHI,of%20non%20U.S.%20citizens).)
- ePHI – electronic Personal Health Information

Safeguarding

- To help health care professionals avoid potential
- Administrative – actions, policies, and procedures to detect, contain, correct, and ultimately prevent security violations

- Physical – methods to protect electronic information and related buildings and equipment from environmental hazards and unauthorized entries.
- Technical – policies and procedures that maintain ePHI to allowing access only to authorized personnel or softwares and to prevent unauthorized access to information. Unique user identification, emergency access procedures.
- Creating a culture that values and prioritizes protecting patient information.
- Yearly training and on updated policies, procedures, infrastructures, etc.

Disclosures

- HIPAA, through its Privacy Rule and Security Rule, prevents the disclosure of PII, PHI, and ePHI of any patient information to anyone or anything without consent of said patient.
- Security Rule – supports the Privacy Rule’s prohibitions against improper uses and disclosures of PHI
- Privacy Rule – “A covered entity may not use or disclose protected health information, except either: (1) as the Privacy Rule permits or requires; or (2) as the individual who is the subject of the information (or the individual's personal representative) authorizes in writing.”
